

Outpatient Therapy @ The Wellness Center
Inclement Weather Plan
(540) 332-5935

With winter weather upon us again, please be aware that although we try not to close our clinic, we also want to be aware of safety- both for you and for our staff.

- If you feel you can't safely come in because of roads or other concerns, please don't! But call and let us know you can't make it due to weather- that keeps us from waiting around and holding your spot.
- Be aware that though we have a great maintenance department, they have to keep all the sidewalks and entryways of the whole hospital campus clean. Sidewalks and parking lots can be icy despite everyone's best efforts.
- We may close the clinic if we have a substantial amount of snow (either overnight or during the day). A message to that effect will be put on the answering machine.
- Please call the clinic if you are in any doubt as to whether we are open, or if you should come.
- Road conditions where you live may be much different than they are here in Fishersville!
- You may get an additional call from the appointment reminder service stating that we MAY or WILL be closed, especially for an overnight snow event.
