

Welcome

Thank you for choosing the Augusta Health Computed Tomography (CT) Department.

Your physician has referred you for a CT scan to help diagnose or evaluate a medical condition, injury, or other health concern.

After registration, you will be greeted by a member of our care team, either a CT Technologist or Imaging Assistant. You will be escorted to a private preparation area where your exam will be explained, and your medical history will be reviewed.

Depending on the type of exam being performed, you may be asked to change into a gown to ensure the highest-quality images. If you need assistance at any time, please let a member of our team know. We are happy to help.

For some exams, an intravenous (IV) line may be started so contrast material can be administered during the scan.

What Should I Expect?

Once you are prepared for your CT scan, you will be escorted to the CT exam room and positioned comfortably on the scanner table, typically lying on your back.

Your CT Technologist will explain the procedure, including how long the exam will take and any instructions you will need to follow during the scan. Most CT exams take between 5 and 20 minutes to complete, depending on the type of study being performed.

Throughout the exam, our team will work to ensure you are comfortable and informed every step of the way.

Your Feedback Matters

You may receive a patient satisfaction survey from Press Ganey following your visit. We greatly appreciate your feedback and encourage you to take a few moments to share your experience. Your input helps us continue providing exceptional care for our patients and community.

Thank you for choosing Augusta Health.
