

What should I expect?

After you register, you will be greeted by a Sonographer who will escort you to an exam room, explain the procedure, and prepare you for your ultrasound exam.

Depending on the type of exam being performed, you may be asked to change into a gown. This helps ensure the best imaging results and your comfort during the procedure. If you need assistance, please let your Sonographer know. We are happy to help.

Most ultrasound exams take approximately 30 minutes to 1 hour to complete.

During the exam, the Sonographer will apply warm ultrasound gel to the area being examined and gently move a handheld device called a transducer over your skin to obtain images. If you have any questions or concerns at any time during your exam, please let your Sonographer know. They will be glad to assist you.

What is Ultrasound?

An ultrasound exam uses sound waves to create images of structures inside the body without the use of radiation.

At Augusta Health, our goal is to provide a comfortable and compassionate experience while respecting your privacy and individual needs. If there is anything we can do to make your visit more comfortable, please let us know.

Your Feedback Matters

You may receive a patient satisfaction survey from Press Ganey following your visit. We greatly appreciate your feedback and encourage you to take a few moments to share your experience. Your input helps us continue providing exceptional care for our patients and community.

Thank you for choosing Augusta Health.
